

Profile

Founded 1859, the Wilh. Lambrecht GmbH develops, manufactures and distributes meteorological instruments and is therefore the most experienced manufacturer worldwide specialized in meteorological instruments. Innovation, performance, quality and durability are the key factors of this lasting tradition.

Lambrecht delivers to more than 100 countries and supports a service network with partners in 60 countries.

Products

- Sensors for wind direction, wind speed, temperature, humidity, pressure, precipitation, evaporation, radiation, airflow.
- Mechanical instruments, recording and indicating.
- Stand-alone instruments and systems for indoor climate monitoring and controlling.
- Handhelds for wind speed, temperature, humidity, pressure, airflow.
- Automatic weather stations and data acquisition systems.
- Naval weather stations.

Services

Our highly industrialized world becomes more and more controllable and transparent. One basic factor however remains untouchable: the weather. Everybody is somehow affected by meteorological influences, and often economic success as well as public life depend on reliable weather measurements and forecasts.

The Wilh. Lambrecht GmbH develops, manufactures and distributes systems necessary to determine and evaluate meteorological parameters. Our products are used worldwide and are well known for their ultimate reliability under most severe conditions in any climate. Parameters like temperature, humidity, pressure, precipitation, evaporation, airflow, wind and radiation are measured with sensors, saved with data loggers and evaluated with the appropriate software.

Beginning with demand-oriented advice and project engineering, we take care of installing the systems and training the users and offer after-sales service including calibration in our own wind tunnel.

Fields of application are naval industry, wind energy systems, weather services, agricultural and forest economy, industrial companies, building conditioning, stock keeping, quality assurance, museums, road services, airports, mining, environmental protection.
