AF210 Hot Wire Anemometer

Overview

The versatile Digitron hot wire anemometer uses hot bead technology to measure air or gas flow in pipes or ducts from 0.1m/s to 10m/s. The AF210 anemometer can also function separately as a simple thermometer allowing user versatility.

The rugged case design, large clear display and 100 hour battery life, ensure that this instrument is suitable for continual and heavy use in the most demanding, working environments.

Features

- Temperature and air velocity measurement with a single probe
- Interchangeable probes
- Smoothing function for use in fluctuating airflows
- Metric and imperial measurement
- Battery life of over 100 hours
- Easy zero function
- n point averaging to ease air flow calculations
- Backlit display
